Skills

I am experienced with designing and developing simple, powerful user experiences, and have a strong understanding of the software engineering that brings them to life.

I have extensive experience programming in Python, with a focus on skills relevant to artificial intelligence, machine learning, and computer vision.

Experience

G & B Enterprises, Inc. / System Administrator

MAY 2016 - PRESENT, BIRMINGHAM, AL

- Managed all office computer systems.
- Managed office server and mitigated network issues.
- Created and maintained company website.

Copy and Photo Café / Graphic Designer, IT Manager

OCTOBER 2015 - MAY 2016, VESTAVIA HILLS, AL

- Completed Photoshop and InDesign projects for clients.
- Managed all office computer systems.
- Managed office server and mitigated network issues.

Yuhua Song Research Group / Work-Study Intern

AUGUST 2014 - OCTOBER 2015, BIRMINGHAM, AL

- Assisted with electrophoresis experiments on cancer cells.
 - Assisted with research on previous cancer-related experiments.
-

Education

Auburn University / M.S. in Computer Science

AUGUST 2020 – PRESENT, REMOTE

I began my college career at UAB in 2016, and graduated in 2020 with a bachelor's degree with distinguished honors in computer science. I minored in neuroscience. Following my graduation from UAB, I was accepted into Auburn's Master of Science in Computer Science and Software Engineering program. With the completion of my master's on the horizon, I am now transitioning to Auburn's Ph.D. program.

Awards

UAB awarded me their Presidential Recognition Scholarship for my exceptional performance in high school, which covered all tuition and fees for my bachelor's degree.
